In 2007, the Bridgewater Fire Company took delivery of their Mobile FIRETRAINER[®] T-4000 with state-of-the-art fully automatic agent detection and manual operator control capabilities. Funded by the 2006 Assistance to Firefighters Grant Program, the T-4000 provides a wide array of training capabilities, including laddering, search and rescue, fire suppression, ventilation, and rapid intervention.

The Bridgewater T-4000 is not only used for in-house training, but it has also been made available to nearby departments in Oneida County, NY.

The Bridgewater Fire Company, established in 1914 as the Bridgewater Chemical Co., proudly serves its 3,000 citizens.
